

"This year's EMO raised the bar in all areas with more visitors, more business and more international drawing power, this EMO has proven even more successful than last time around, impressively underscoring the event's status as the world's premier trade fair for the international metalworking industry," said EMO General Commissioner Carl Martin Welcker at the end of the fair.

News

Pictures of TaeguTec at EMO

TaeguTec was front and center at the Machine Tool World Expo 2013 (EMO) in Hannover, Germany from September 16 to 21, 2013.

South Korea's leading metalworking company showcased its vast array of innovative tools that outperform the competition and help industrial users in the metal removing industry cut cost.

New Product

LionMill 90 Degree Heavy Expansion Reigns In

TaeguTec's LionMill series has added a 90-degree line of cutters and inserts to its already hugely popular 60-degree family.

The newly developed 90-degree cutter's unique dovetail wedge design securely fastens the insert with a powerful clamping force that ensures stable machining and improves precision, tool life and surface finishes.

RhinoRush Case Studies

To meet the demands requested by industrial users for reduced machining cost and competitiveness, TaeguTec recently launched the smaller and stronger double-sided insert which improves machining time and surface finishing.

RhinoRush 9 millimeter size and strength is optimal for interrupted cutting on weak or old machine setups.

TaeguTec's Facebook page offers four success stories about the RhinoRush's performance against the competition.

Engineering Joke

Engineer in Hell or Lawyer in Heaven?

An engineer dies and reports to St. Peter. "Ah, you're an engineer," says St. Peter. "You're in the wrong place."

So, the engineer reports to the gates of hell and is let in. Pretty soon, the engineer gets dissatisfied with the level of comfort in hell, and starts designing and building improvements. After a while, they've got air conditioning, flush toilets and escalators.

One day, God calls Satan up on the telephone and says with a sneer, "So, how's it going down there in hell?"

Satan replies, "Hey, things are going great. We've got air conditioning, flush toilets, escalators, and there's no telling what this engineer is going to come up with next."

God replies, "What? You've got an engineer? That's a mistake. He should never have gotten down there; send him up here."

Satan says, "No way. I like having an engineer on the staff, and I'm keeping him."

God says, "Send him back up here or I'll sue."

Satan laughs uproariously and answers, "Yeah, right. And just where are you going to get a lawyer?"

TaeguTecTimes.com is proud to present its new section that looks at the lighter side of engineering.

If you know a good engineering joke, please share by replying to this email. You won't win a prize but you will win something far better, a place on the newsletter and the satisfaction knowing that your joke was enjoyed by all.
